

ALECTRIS

SOLAR ASSET CARE INNOVATION.SM

The Alectris suite of integrated care services is engineered to identify risk and secure and enhance profit for your solar PV plant portfolio.

Experience the solar PV asset care innovation Alectris has developed to manage and maintain your solar photovoltaic (PV) plant portfolio.

With our integrated suite of products, services and award-winning software, we empower you to increase plant productivity by providing one source for operations, maintenance and management support.

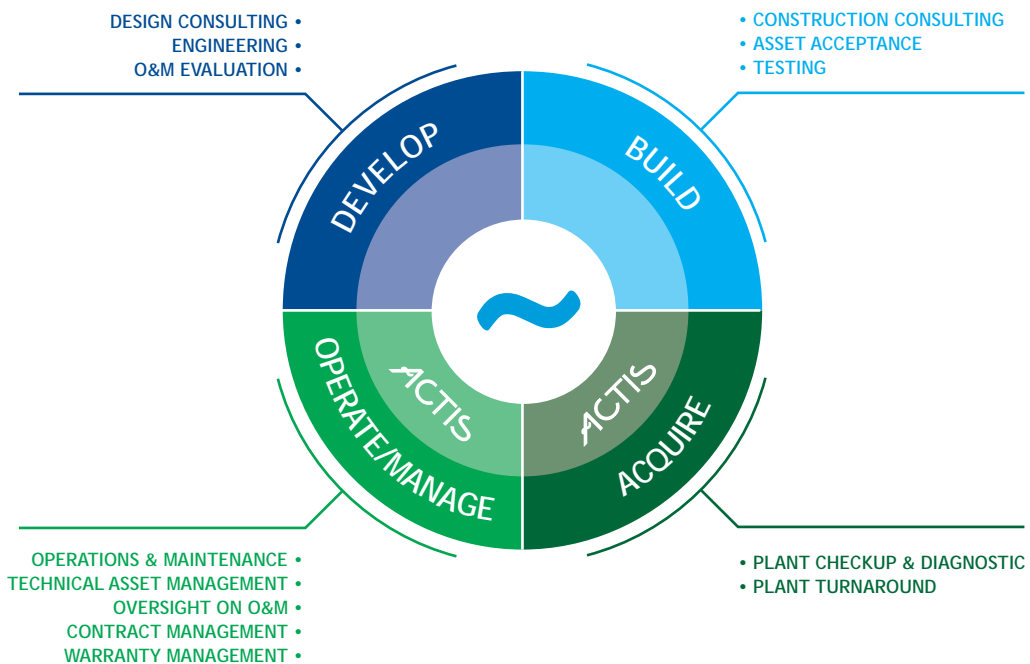

Our integrated solar operations, maintenance and asset management services deliver profit for your portfolio:

- We are focused solely on the care of solar PV assets.
- Our solar asset care services are proven. As of September 2015, plants in four countries with a total capacity of 313 MWp are under Alectris care.
- Our integrated suite of solar PV services are engineered to identify risk and secure and enhance profit for your solar PV plant portfolio.
- At the core of our unique and comprehensive approach to solar PV energy assets management, is ACTIS (Asset Control Telemetry Information System), our award winning solar enterprise resource planning platform (Solar ERP). ACTIS delivers an integrated platform of solar investor and plant owner benefits.

Integrated Solar PV O&M and Asset Management Services

24 MWp Georgia Power Portfolio
U.S. Based O&M Management Portfolio

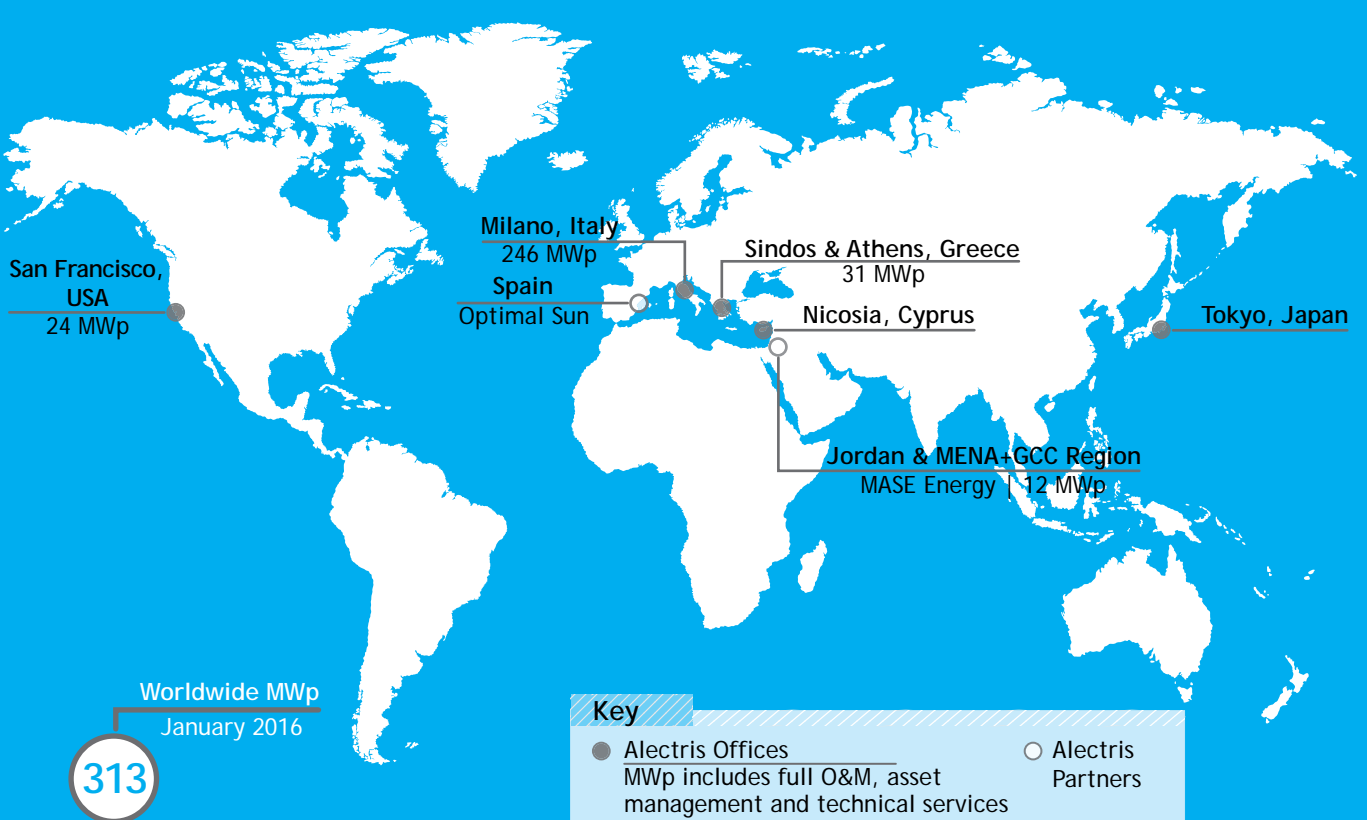

4 MWp GRU.CO Portfolio
4 Sites of 1 MWp Each

“ Finally I am glad to say that I found a good and professional O&M contractor. I was extremely skeptical at the beginning due to a very bad previous experience. Alectris immediately took steps to improve the production of my PV plants following a rigorous analysis, and the benefits were notable, significant and durable. We have been working together for more than a year now and I am completely satisfied. ”

Michele Romanin Jacur
General Manager
