# ACTIS

## One System to Take Full Control of Your Solar Portfolio

Standardize portfolio management, remove the risk of murky information and increase operational and cost efficiency with ACTIS.

## Worry-free Solar Assets

Since 2006 our operations, maintenance and asset management team has been treating solar plants like they were our own.

## Convert Existing Solar Capacity to Additional Revenue Generation

We test and deploy new innovative technologies to get more capacity from solar assets and increase your return on investment. How much more can you realize from your solar plants?

## Customers Come First

Visit our website to see why we believe these customer testimonials tell us we're doing solar asset care right. Our solar team is here to win your trust as well!

“ The intervention and system restoration performed by Alectris on our Lazio solar plant has completely restored the plant functionality including its tracker perfect synchronization. Additionally, we have employed the Alectris Solar ERP System ACTIS to properly manage this plant remotely.

We have found the Alectris team to be highly skilled, with deep solar PV expertise and very customer care oriented. We would strongly recommend Alectris as a reliable and expert PV service provider. ”

**Matteo Riccieri, Chief Operating Officer,  
Rete Rinnovabile**

“ Investors need O&M suppliers who care about their solar power plants as if they were their own. Alectris has demonstrated that level of care and ability to deliver sophisticated O&M services for the solar investor. ”

**Guy Vanderhaegen, CEO, Origis Energy**

## Global MWp
